**Subject:** Exide schedule

Hi Lornette,

Since I'll be out next week when South Coast drafts their schedule – here's what I recommend we add to the schedule:

Scenario 1 – No comments or public hearing

- EPA will conduct its review of the draft during the public comment period and pass along any concerns during that time.
- End review period 5 days after comment period. Request that South Coast notify us as soon as possible that no comments were received or that a hearing is happening.

Scenario 2 – Comments/public hearing take place

- EPA will conducts its review of the draft during the public comment period and pass along any concerns during that time
- When the response to comments/permit changes (if needed) are sent to EPA – will end review period within 5 days or less.

Thanks Lornette! Feel free to give me a call on my cell phone Ex. 6 - Personal Privacy if what they send something doesn't fit into these 2 scenarios.
